

### REMARKS

The present supplemental preliminary amendment makes editorial revisions to the claims. The expression "central terminal" has been replaced by the simpler expression "terminal". Claim 61 has been amended to delete the superfluous recitation that the central contact leads extend across the edge bounding the hole. The other recitations of the claim already state that the central contacts are encompassed by the hole in the dielectric layer. Implicitly, the central contact leads, which extend to these central contacts must extend into the region bounded by the edge of the hole. Also, claim 68 has been amended to make it clear that the ground plane can be at various vertical elevations. See, e.g. page 47 line 34 through page 48 line 14.

For all of the reasons set forth above, prompt and favorable consideration of the amended application, and allowance of claims 61-70, is respectfully requested.

Respectfully Submitted,

LERNER, DAVID, LITTENBERG,  
KRUMHOLZ & MENTLIK
